
(a) Performance Defect Case Analysis
Problem: Generate an abstract for the title "XXX" using the following items:
1. Electrostatically levitated thick-film Ni Rotor ...
2. Non-silicon rotational MEMS gyro ...
User History:
Abstract 1: According to my research....The paper talks about.....
Abstract 2: I think...The paper shows..... 【Less than 100 words】
.....
Abstract n: In my opinion.....It describes..... 【Less than 100 words】
LLM
RAG asnwer: The single-neuron control system for a non-silicon rotational gyro is designed to address the challenges of nonlinear spinning in microelectromechanical systems..... 【150 words】
Training-free and Model-agnostic
SFT answer: In my Opinion, A single-neuron spinning control system for a non-silicon rotational gyro is proposed. The system uses a rotor electrostatically levitated in ..... 【80 words】
